

### After the fire ...

This is a very thin issue. The work involved in the organisation of EPE '95 was so huge that your day and night working secretariat was not able to manage to offer you a normal issue.

I am truly sorry for this because I know that you wait for your own copy of the EPE Journal. Anyway, this will leave you with some more time to read the (heavy) proceedings set of the Sevilla Conference. In case you do not have your own set, please see p. 35.

Nevertheless, I have a great news for the future: from this month on, we will be three to handle all the secretariat business. Our future plans are:

- 4 to 6 June 1996, Nancy, France: EPE Chapter Symposium on Electric Drive Design and Applications;
- 2 to 4 September 1996, Budapest, Hungary: PEMC '96;
- 7 to 8 November 1996, Mons, Belgium: EPE Chapter Symposium on Components "What changes will bring component integration to power electronics";
- 8 to 10 September 1997, Trondheim, Norway: 7th European Conference on Power Electronics and Applications, EPE '97;
- Tutorials linked to these conferences, courses organised in various places on topical subjects, mainly during the summer months;
- ...and a REAL QUATERLY EPE JOURNAL!

Brigitte Sneyers, Editor
