

EPE Journal: how about 1994?

B. Sneyers

Electrical engineering degree from the Université Libre de Bruxelles
Fellow of the Belgian American Educational Foundation
Member of the SRBE-KBVE
Editor of the Revue E, E tijdschrift and EPE Journal
(VUB - TW - KBVE, Pleinlaan 2, 1050 Brussel, Belgium)

G. Maggetto

Professor at the Vrije Universiteit Brussel
Chairman of EPE Conference Brussels
Past president of EPE Association
President of SRBE/KBVE, Royal Belgian Society of electrical engineers
President of ASBE, Belgian section of AVERE, the European Electric Vehicle Association
Secretary General of CITELEC, European Association of Cities interested in electric vehicles
(VUB-ETEC, Pleinlaan 2, B-1050 Brussels)

Two years ago, the first issue of the EPE Journal was published. Months of sweat and tears found their accomplishment in those 88 pages of scientific, technological and general information in the Power Electronics field.

Two years have passed by and this is the 10th issue of the EPE Journal. Experience has been gained. Prospective authors know where to write to propose the results of their work and the waiting list ensures that only high quality papers find a place in the pages of our Journal.

Unfortunately, new members and subscribers have not been as many as expected. Probably, too many of you were thinking that the EPE Journal was for free, and this was almost the case as 10.000 copies of each issue were sent out for promotional and advertisement purposes. Now, a change of publisher is taking place. The next issue, the december one, will be the last one that will be sent from Berlin and we wish, here, to thank the team of the vde verlag for the fine collaboration and help during the start period of the EPE Journal.

And after? We can hear you asking. The EPE Association will continue to publish the EPE Journal. The first issue of 1994 will appear in March as usual. But, be careful! Only paying members of the EPE Association and subscribers to the EPE Journal will regularly receive their copy. In other cases, you might receive from time to time a copy as a reminder of our existence.

The EPE Journal is now recognized as a truly European specialized Journal on Power Electronics, Drives and Applications of very good scientific and technological level, and will stay as it is.

We just want you to stay in touch with the editing team. So, turn to page 200, fill in the form, send it back with your payment and you will be sure to receive your own copy of the EPE Journal in 1994.
